M SANJANA

Junior Developer | AI-Assisted Development | Software Engineering

+918309716327 sanjanamadishetti27@gmail.com LinkedIn GitHub Hyderabad, India

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong foundation in Java, Python, object-oriented programming, SQL, and web development fundamentals. Hands-on experience building functional AI-powered applications using LLM integration, React.js, backend APIs, and AI-assisted development workflows. Eager to contribute to real-world software projects, learn from senior developers, and strengthen coding, testing, version control, and problem-solving skills

SKILLS

Programming Languages :	Java, Python, SQL
AI & LLM Technologies :	LLM Integration, Prompt Engineering, AI-Powered Applications, Groq API, AI-Assisted Coding
AI Coding Tools :	ChatGPT, Claude, Antigravity
Web Development :	HTML, CSS, React.js, Spring Boot, FastAPI, REST APIs
Databases :	MySQL, PostgreSQL, Relational Databases
Developer Tools & Cloud :	Git, GitHub, AWS Cloud Fundamentals, PyPDF, Pydantic
Core Computer Science :	Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Computer Networks, Software Development Life Cycle (SDLC)
Professional Skills :	Problem-Solving, Analytical Thinking, Communication, Team Collaboration, Technical Documentation, Adaptability

PROJECTS

Reflekt AI – AI-Powered Resume Assistant | Github

- Developed an AI-powered resume assistant that enables recruiters to ask conversational questions about candidates' skills, projects, and experience.
- Integrated Python backend APIs, a React.js frontend built using HTML and CSS, and the Groq LLM API to generate context-aware responses from structured resume information.
- Used ChatGPT, Claude, and Antigravity to support code generation, troubleshooting, and iterative feature refinement, applying prompt engineering to improve application workflows.
- Implemented PDF parsing and information extraction using PyPDF, with Pydantic for structured data validation before generating AI-powered responses.

Technologies / Tools Used : *Python, FastAPI, Groq API, LLM Integration, PyPDF, Pydantic*

UPI MeshPay – Offline UPI Payment Simulation | Github Render

- Developed a Java-based payment processing backend using Spring Boot REST APIs to support transaction validation, state management, and store-and-forward settlement workflows.
- Implemented transaction security mechanisms using RSA-2048, AES-256-GCM encryption, SHA-256 hashing, nonce validation, and timestamp verification to help prevent replay attacks and detect duplicate transactions.
- Integrated Spring Data JPA and an H2 database to support application data management and transaction processing.
- Containerized and deployed the application using Docker and Render, gaining practical experience in application deployment and backend integration.

Technologies / Tools Used : *Java, Spring Boot, Spring Data JPA, Maven, H2, RESTful APIs, Docker*

EDUCATION

Malla Reddy University | Hyderabad — 2022 - 2026
Bachelor of Technology (B.Tech) in Computer Science and Engineering — *CGPA : 9.2/10*

Narayana Junior College | Hyderabad — 2020 - 2022
Intermediate / Higher Secondary — *CGPA : 9.8/10*

LEADERSHIP & EXTRACURRICULAR

- Coordinated technical events involving **80+ participants**, collaborating with faculty, volunteers, and event teams while improving organizational efficiency.
- Prepared technical documentation, coordinated project activities, and communicated requirements effectively across multiple stakeholders.
- Delivered technical presentations demonstrating strong written and verbal communication skills in collaborative environments.
